

# COMARCH DIAGNOSTIC POINT

High demand for accessible and convenient healthcare has led to the rapid development of telemedicine services. Among these services are diagnostic points, which allow proper care to be provided to patients – anywhere, any time. Comarch Diagnostic Point is the right solution to overcome the many barriers and challenges the medical industry faces today, including appointment scheduling and availability, overcrowding, lack of time, high costs of treatment, and many more. Comarch Diagnostic Point is dedicated to everyone willing to take better care of their health, as well as for patients with specific diseases or conditions.

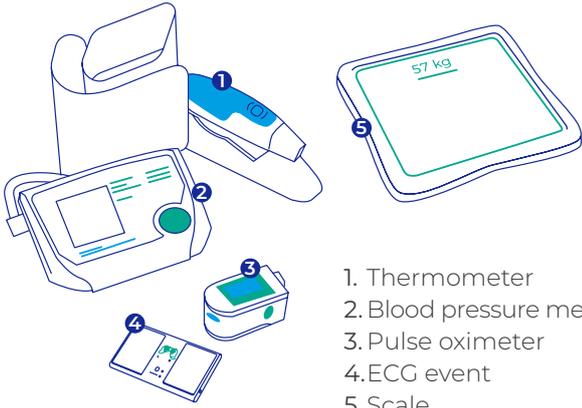

## How it works?

Comarch Diagnostic Point consists of devices and software enabling simple and quick measurements of each patient's basic vital parameters. Comarch Diagnostic Point is also available as a portable Comarch Health Case.

The operational scheme is provided simply via an application available on a tablet. The application guides the patient and indicates the order of tests. Data collected from peripheral devices are received by Bluetooth before being transmitted to the Remote Care Center.

## Comarch Diagnostic Point components:

1. Thermometer
2. Blood pressure meter
3. Pulse oximeter
4. ECG event
5. Scale

### Comarch e-Care Platform

State of the art web system enabling the safe transmission of a patient's records and analysis of provided data. This platform supports online consultations with medical professionals, available upon prior reservation.

## Examplicatory implementations of Comarch Diagnostic Points

Shopping malls  
Office buildings

Insurance companies  
Hotels, SPA salons, gyms

Airports and stations  
Airplanes, trains and cruise ships

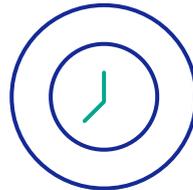

## Benefits of the solution

Greater access to diagnostics and medical care

Increase in the effectiveness of prophylaxis, diagnostics, and therapy

Promptly scheduled appointments, without long waiting periods

Immediate access to basic examinations in the event of a health problem

Convenience for both patients and caregivers

Improved patient awareness of their own health

Reduced overcrowding in medical facilities

Considerable savings in medical care costs
